the Environment

Spill Response Management RESPONSE PROGRAM

- Identify the cause/spiller as potential responsibly party (PRP)
- Immediately assure that police/fire/health departments are notified and other response agencies, depending on type of spill
- Evaluate need for spill containment or clean up and coordinate contractor selection for clean up as appropriate
- Determine levels of performance/cost of clean up while assuring personal safety
- Disposal Proposal will be evaluated to determine the most affordable method per incident basis
- Assure that closure reports are completed and submitted to the appropriate regulatory agency
